----------------------	--

SKILLS

PROGRAMMING LANGUAGES	C#	Python	HTML5
	CSS3	JavaScript	PHP
	T-SQL	MySQL	pgSQL
	C	Assembly	

WORK EXPERIENCE

SUMMER 2016	Technology Assistant at VALLEY MUSEUM & ARCHIVE SOCIETY For the Valley Museum & Archives, I developed and designed a new website. I built a custom WordPress theme and integrated a matching Omeka theme to help showcase the museums artifacts. This included an interactive 360 degree view of collection pieces. Additionally I configured a network attached storage system with multiple access levels and wrote a program capable of connecting the users to the correct file shares dependent on permissions.
2010 - 2016	Safety Crew at LAKE LOUISE ALPINE SKI WORLD CUP I was part of the team responsible for installation and tear-down of the safety equipment for the World Cup Downhill Alpine Ski Race and Super-G. I was also responsible for maintaining sections of the race track, and reparations to the safety equipment in the event of an accident.
2012 - 2015	Tree Planter at INTEGRITY CONTRACTING Planting trees for Integrity Contracting was an amazing experience. I worked with some of the most unique and interesting people I have ever met. I value the friendships I made. I spent most days working unsupervised while meeting high quality standards and production. This required a high level of physical fitness, mental focus and problem solving.
